

# PoweRasp™ Attachments

Harness the Power of Specialty Resection

*The only family of arthroscopic reciprocating bone resection devices on the market.*

Learn more about  
the PoweRasp  
attachments

**Arthrex®** 

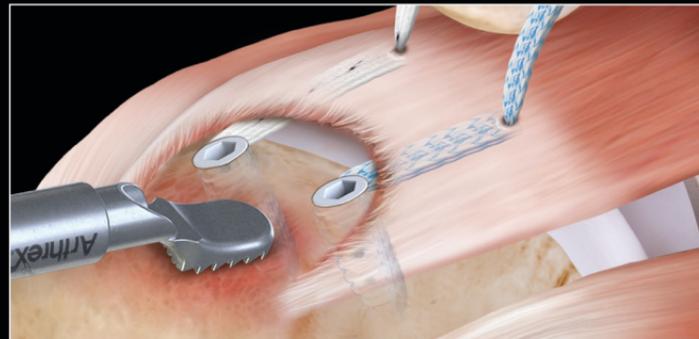

**23%** Faster debridement rate than an oval burr during an acromioplasty<sup>1</sup>

PowerRasp™ attachments can facilitate:

- Subacromial decompressions
- Distal clavicle excisions
- Notchplasty procedures
- Osteophyte removal
- Creation of a bleeding bone surface to accelerate tendon-to-bone healing

PowerRasp attachments are designed to increase procedural efficiency by:

- Allowing easy access
- Reduced skipping
- Reduced tissue wrapping
- Creating flat surfaces
